Ukraine

LET'S SAVE THE ENVIRONMENT TOGETHER!

The ELFIKI® toy brand follows its own unique philosophy of kids' learning through play and care for the environment at the same time. An actual product line of eco-friendly toys made with bio-based plastics. Bioplastic is a high-density polyethylene that include sugar cane and is an environmentally friendly raw material that is 100% recyclable. Sugar cane absorbs the harmful carbon dioxide as it grows and does not pollute the environment being processed into a raw material. Bioplastic has the same quality and durability as traditional plastic. By caring for our kids and the planet we can make the world better for future generations.
